

# ***Keep Your Car Longer Save On Gas and Auto Repairs***

**[www.aerohybridpower.com](http://www.aerohybridpower.com)**

**High gas prices, insurance, maintenance, breakdowns, towing, emergency repairs, auto loan payments and more can exceed other household expenses including housing and food.**

- You can't shop around for the best deal when your car breaks down on the road
- The work is usually done where you were towed to
- Many towing plans pay for the first 5 or 10 miles but charge more for every extra mile
- Extended warranty and service plans have exclusions and may pay less than you expected
- A day or two lost from work can cost you hundreds of dollars
- A failed component can cause unexpected damage or wear to other parts of your vehicle

**Replacing old parts on a scheduled basis before their expected failure saves money and prevents unexpected breakdowns.**

***We'll show you how to keep your vehicle running well and avoid expensive emergency repairs.***

**Common maintenance costs are Oil Changes, Alternator Replacement, Batteries, Brakes, Automatic Transmission, Radiator & Cooling System Fluids, Tires, Suspension, Fuel System and more.**

- There's a lot of mis-information and confusion about servicing your vehicle on the internet, in magazine articles and even from professionals.
- When it comes to servicing your car, the old adage, "if it isn't broke, don't fix it" may be a bad idea. On the other hand you don't want to pay for service you don't really need.
- We'll show you how to spot problems and fix them before they become disastrous breakdowns and costly repair bills.
- Listen to our announcements and shows and read articles on our websites, magazines and handouts to learn how you can maintain your vehicles at the lowest cost and avoid annoying breakdowns.

**Our goal is to eliminate imports of oil from other countries and use alternative fuels combined with domestic oil products to meet our needs. We're working on fuel efficient vehicles, vehicle upgrades and maintenance methods that reduce fuel consumption, reduce total overall vehicle costs and make driving affordable.**

# ***ZERO Oil Imports By 2025***
