

Plug-In Hybrids Are Good For The Environment & A Great Deal For You

Ford C Max Energi

Ford Fusion Energi

Chrysler Pacifica Plug-In Hybrid

Chevrolet Volt

Plug it in **When It's Convenient for You** to protect the environment and save YOU money on gas. Get great fuel economy if you don't plug-in, and better fuel economy if you do plug in. No worries about getting stuck because of a low battery. No worries about finding a charging station. Plug it in anywhere, any time, whenever you feel like it, at your convenience. You can plug in to an ordinary 110 volt outlet or a charging station. If you have your own garage, a **Plug-In Hybrid** is the car you want to own, and they have a good track record for reliability and long vehicle life. (A Custom Concept Plug-In Prius has over 245,000 miles and still runs like new)
